#### ABOUT HILLROM

Hillrom is a global medical technology leader whose 10,000 employees have a single purpose: enhancing outcomes for patients and their caregivers by advancing connected care. Around the world, our innovations touch over 7 million patients each day. They help enable earlier diagnosis and treatment, optimize surgical efficiency and accelerate patient recovery while simplifying clinical communication and shifting care closer to home. We make these outcomes possible through connected smart beds, patient lifts, patient assessment and monitoring technologies, caregiver collaboration tools, respiratory care devices, advanced operating room equipment and more, delivering actionable, real-time insights at the point of care. Protecting Patients by  
Mobilizing Earlier and Often

Safe Patient Handling & Mobility Solutions

# Mobilizing In-Bed, Up-from-Bed & Out-of-Bed

## Set a New Standard of Care

Every day, there are missed opportunities to mobilize patients. That's why a new standard of care is necessary to help reduce complications associated with immobility and provide a safe and effective practice for mobilizing patients.

Help protect patients from these complications by supporting mobility earlier and often with Hillrom™ safe patient handling solutions.

Liko® lifts and clinical programs contribute to:

- Ease and frequency to completing care
- Feasible and safe mobilization
- An expected pattern of care

Various in-bed, up-from-bed, and out-of-bed activities can be performed utilizing the lifts and soft accessories.

<b>IN-BED</b> Totally Dependent	<ul style="list-style-type: none"> <li>▪ Repositioning</li> <li>▪ Side to side turning</li> <li>▪ Wound care</li> <li>▪ Limb lifting</li> <li>▪ Linen changes</li> </ul>	<ul style="list-style-type: none"> <li>▪ Hygiene procedures</li> <li>▪ Posterior assessment</li> <li>▪ Catheter insertion</li> <li>▪ Horizontal transfers</li> </ul>
<b>UP-FROM-BED</b> Dependent / Not Ambulating	<ul style="list-style-type: none"> <li>▪ Sitting out of the bed</li> <li>▪ Bed to wheel chair</li> <li>▪ Bed to chair</li> <li>▪ Bed to commode</li> </ul>	<ul style="list-style-type: none"> <li>▪ In-chair repositioning</li> <li>▪ Standing assessment</li> <li>▪ Strength training</li> </ul>
<b>OUT-OF-BED</b> Ambulating	<ul style="list-style-type: none"> <li>▪ Gait training</li> <li>▪ Assist device training</li> </ul>	<ul style="list-style-type: none"> <li>▪ Physical therapy</li> <li>▪ Treadmill training</li> </ul>

A safe patient handling & mobility program is critical to help advance mobility practice, drive culture change, and achieve sustainable results.

## Safe Transfers and Movement™ Program

The Hillrom™ Safe Transfers and Movement™ Program gives you complimentary access to:

- A comprehensive set of tools
- Clinical expertise of our people and design of our products
- Support driving culture change
- Safe patient handling and mobility protocols
- Access to program workshops, continuing education courses and more

# Improved Outcomes Made Feasible & Safe

The American Nurses Association recommends Safe Patient Handling & Mobility (SPHM) and led the development of national interdisciplinary SPHM standards. The goal of the standards is to establish uniform, national guidance to prevent injuries for both caregivers and patients, across the care continuum.

The value of SPHM programs, with technology like Liko® lifts and accessories, has many benefits that include improving quality of care and mobility. When combined with early mobility and fall prevention protocols, improved outcomes driving reduced length of stay and falls can be achieved. Below are examples of from healthcare facilities that have adopted SPHM programs.

## IMPROVED OUTCOME: REDUCED LENGTH OF STAY<sup>1</sup>

## IMPROVED OUTCOME: MITIGATING FALLS<sup>2</sup>
